THE EVENT OF THE SEASON

Backetors. The band orchestra, consisting of eight pieces, entertained the audience with some very fine music, and received the well-carned compliment of being equal to the average protessional orchestras. This is the second presentation of Our Backetors by the Dramatic Club to the same andience, and it is probably as high a compliment as the most ambitious amateurs could desire that they were greeted in their second presentation by so large and intelligent an audience.

It is thought by the members of the band that the entertainment will not between \$125 and \$150, which, added to the amount already in hand, will provide the coveted uniforms and leave a little surplus.

American Fruit Evaporator!

Every fruit-grower needs an evaporator. The fruit annually wasted on the Pacific Const would, rightly cured, go far toward supplying this want. The evaporator is the growers' brake upon a down grade of prices. The AMERICAN is pre-evinently the fruit-resear's machine. Its sizes grade from domestic to manufacturing wants. It makes the highest quality of work with ordinary case in handling. There is no need of making anything else. Though approve a slight use of sulphur, the AMERICAN is specially adapted for his hest grade in unbleached work. It places freshout fruit first in highest and dryest heat; cures out surfaces at once and keeps them dry, thereby setting and making permenent to color, and also, thereby, as in broiling steaks, securing the highest quality in product. We place our experience in evaporating at the disposal of our customers. In some cases this gratuitous service is of more value that prices paid us for evaporators. Our Pacific Coast Price List and Illustrated Manual sent on application.

Purchasers of lots will have no expense of grading.

The streets will be graid and shade trees planted by the present owners of the tract at their own expense.

The fact that the tract has been worked by Chinamen as a ve, stable garden is sufficient proof of the excellency and richness of the soil.

Purc, excellent drivking water is struck in wells on any lot at a small depth.
